Question 25: A. relationship B. relation C. relate D. relationships

Part 2. Read the passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the questions

Life expectancy is the period of time that a person can expect to live. Life expectancy varies greatly between genders and cultures. It used to be that women had a lower life expectancy than men (1 in every 4 women died in childbirth), but now they live an average of four to five years longer than men. Life expectancy has been increasing rapidly over the last centuries. With the advent of such modern miracles as sewers, medicine and a greater understanding of how diseases are spread, our life expectancy has increased by 25-30 years.

33	Mrs. Wilson has lived in this city for 5 weeks. Hoặc: Mrs. Wilson has been living in this city for 5 weeks.	0,5

* Mỗi câu tự luận đúng được 0,5 điểm.

Write an article (120-150 words) about some advantages and disadvantages of living in a smart city. (1 điểm).

Smart cities are built on new technologies to improve people's lives. The idea of living in one of them sounds very exciting. But is a life controlled by smart technologies good or bad for us?

Let's start with the advantages. Living in a smart city brings increased efficiency in resource management, optimized transportation systems, and enhanced public safety. It offers benefits such as improved energy and water usage, real-time traffic updates, and surveillance for better security.

What about the disadvantages? Privacy becomes a major issue with extensive data collection, raising fears of misuse. Over-reliance on technology also poses risks of system failures and cyber-attacks. Additionally, the digital divide may deepen, leaving marginalized communities without access to smart city initiatives.

In conclusion, there are both advantages and disadvantages of living in a smart city. In my opinion, striking a balance between utilizing smart technologies for social benefits and safeguarding individual privacy and inclusivity is crucial. Proper regulations, transparency, and public engagement are necessary to ensure that smart cities truly enhance our lives while addressing the associated challenges.
