Read the passage and mark the letter A, B, C or D to indicate the best answer for each of the following blanks.

Almost a hundred thousand people were killed and most homes were (1) as a result of an earthquake in Tokyo in 1923. The earthquake began (2) minute before noon when the inhabitants of Tokyo were cooking their midday meals. Thousands of stoves were overturned as soon as the earth began to shake. (3), small fires broke out everywhere and quickly spread. The fire engines were (4) from going to help because (5) roads had cracked open. It was impossible (6) fire fighting equipment as most of the water pipes had burst. Consequently, over ninety percent of the (7) was caused by fire rather than by the collapse of the buildings. Most people (8) died were not killed in the earthquake itself but in the fires which followed. If the earthquake had occurred (9) night while people were (10), far fewer would have died.

 C. If only Mary weren't tall enough to take part in the basketball team.
 D. Mary wishes she isn't tall enough to take part in the basketball team.

Mark the letter A, B, C or D to indicate the best answer for each of the following questions.

Have you ever felt a sudden feeling of joy because you heard a favorite song playing? Then you know that music can have a strong effect on your emotions. Try to take advantage of this power of music. It can help get you out of a bad mood or stay in a good mood, says Alicia Ann Clair, professor of music therapy at the University of Kansas. Music can also help you relax and feel more

lively.

To cheer up or boost your energy, listen to Latin music or anything with a strong beat, lots of percussion, and a fast tempo. When you want to relax after a busy day, music with string instruments and woodwinds, less percussion, and a slower tempo can calm you.

Listening to calming music before you start any stressful activities, advises Dr. Clair. "Once you're in a good state of mind, it's easier to maintain it." You can lower stress at work with music, too, by playing relaxing tunes. But only play **them** when you really need them. You can change your mood by switching from one kind of music to another. For example, first play some nice gentle ballads, and then listen to something more energetic. When you want to calm down after a busy week at work, just do the opposite.

Question 13. What is the passage mainly about?

- A. Benefits and drawbacks of listening to music.
- B. The connection between music and moods.
- C. The importance of listening to music.
- D. New ways to listen to music.

Question 14. According to the passage, what should we do before we start stressful activities?

- A. Do more exercise
- B. Feel more lively
- C. Cheer up and boost energy
- D. Listen to calming music

Question 15. The word 'calm' in paragraph 2 is closest in meaning to "make somebody more ____."

- A. tired
- B. worried
- C. relaxed
- D. intelligent

Question 16. The word 'them' in paragraph 3 refers to ____

- A. ballads
- B. relaxing tunes
- C. instruments
- D. activities

Question 17. Which of the following is NOT true, according to the passage?

- A. It's a good idea to listen to gentle music before doing some stressful work.
- B. You can change your feelings by switching music.
- C. Music with a strong beat can make you happier.
- D. You should play relaxing tunes at all times to make you less tired.

Read the following passage and mark the letter A, B, C or D to indicate the correct answer for each of the questions.

Some doctors think that you should drink a glass of water each morning. You should drink this water first, before doing anything else. The temperature of the water should be similar to body temperature; neither too hot nor too cold.

Why should you drink this water? Water helps your body in many ways. It helps clean out your kidneys. It prepares your stomach for digestion. Water can also help your intestines work better. After drinking water, the intestines can more easily take out nutrients from our food. Water also helps us go to the bathroom more easily.

Scientists suggest that people take in 1,600 milliliters of water each day. But don't drink all of that water in one sitting. If you do, your kidneys will have to work much harder to eliminate it. It's better to drink some in the morning and some in the afternoon. Some people think it's better to drink between meals and not during meals. They think water dilutes the juices produced in our stomachs. This can interfere with normal digestion.

Are you drinking enough water every day? Check the color of your urine. If it is light yellow, you are probably drinking enough. If your urine is very dark yellow, you probably need to drink more water. A little more water each day could make you much healthier.

Question 18. What do the doctors advise us to do every morning?

- A. Drink cold water
- B. Drink hot water
- C. Drink a glass of water
- D. Drink too hot or cold water

Question 19. According to the passage, what can the intestines do after we drink water?

- A. prepare for digestion smoothly

- B. take out nutrients from food more easily
- C. interfere with normal digestion
- D. clean out the body completely

Question 20. How much water do the scientists suggest that people should drink a day?

- A. 2,000 milliliters
C. 1,000 milliliters

Question 21. What organ will have to work much harder to eliminate water if we drink it too much?

- A. heart B. digestion • C. kidneys D. stomach

Question 22. Which of the following is NOT true?

- A.** The first thing you should do every morning is to drink water.
B. You shouldn't drink too much water at the same time.
C. You need to drink more water if your urine is light yellow.
D. Drinking water while having meals may interfere with normal digestion.

Mark the letter A, B, C or D to indicate the underlined part that needs correction.
