V. GAP-FILLING: Read the passage. Choose the best answer (A, B, C or D) to complete the passage:

Although they are safe to use in the short term, coal, gas and oil present a long-term threat to the environment. All three types of fossil fuels produce carbon dioxide in (26) _____ greater quantities than plants can use. The carbon dioxide then accumulates in the atmosphere and may even increase the earth's 'heat load' and lead to global rises in temperature. Furthermore, all three fossil fuels are (27) _____ forms of energy. Geothermal power is unlikely ever to be an energy source of major importance. It is limited and is exploitable in only a few places. Wind power is a pollution-free source of renewable energy but it cannot be used in many parts of the world where there is (28) _____ wind. Solar power is renewable, it does not cause pollution and it does not add to the earth's heat load. Unfortunately, solar power is not distributed equally, and in the northern latitudes it is difficult to (29) _____ and store. Solar power also requires expensive equipment. Finally, nuclear power provides a very efficient and renewable power source. However, not only is there a great danger of leaks or accidents but there is also the problem of the (30) _____ of radioactive waste.

VI. READING:

The last two decades have seen enormous changes in the way people's lives are affected by IT. Twenty years ago, few people had access to a computer whilst today most people use them at work, home or school and use of e-mail and the Internet is an everyday event.

These developments have brought many benefits to our lives. E-mail makes communication much easier and more immediate. This has numerous benefits for business, commerce, and education. The World Wide Web means that information on every conceivable subject is now available to us. Clearly, for many people this has made life much easier and more convenient.

However, not all the effects of the new technology have been beneficial. Many people feel that the widespread use of e-mail is destroying traditional forms of communication such as letter writing, telephone and face-to-face conversation. In addition, the huge size of the Web means it is almost impossible to control and regulate. This has led to many concerns regarding children accessing unsuitable websites. In conclusion, developments in IT have brought many benefits, yet I believe developments relating to new technology in the future are likely to produce many negative effects that will need to be addressed very carefully.

Câu 31: In the last twenty years.

- A. there have been dramatic changes in the field of computer science.
